## **SOLVED: How to adjust mixture on a nissan 1400 carburetor ...**

Find the adjustment screws on the front of the carburetor. There should be two screws on the front of the carburetor, which are used to adjust the air and fuel mixture. Often these look like flat-head screws and you can use a screwdriver to turn them, adjusting the amount of fuel and air mixing in the carb.

## **How to Adjust a Carburetor: 10 Steps (with Pictures) - wikiHow**

However, adjusting the carburetor is a relatively simple job that can be done with a basic set of hand tools and a little bit of technical knowledge. This article shows you how to adjust the air fuel mixture and the idle air speed - the two most common adjustments made when tuning a carburetor. Part of 1 of 1: Adjusting your carburetor

## **How to Tune and Adjust Your Carburetor | YourMechanic Advice**

Put the car in gear and apply slight load, (AC on) and set the Idle as you like it. Don't set it too high, as this will cause excessive clutch and brake wear. The Idle only needs to be 7 to 900 RPM with light load or AC on. Recheck timing and vacuum hook ups. Recheck mixture screw to lean best idle again.
