The QM-IDI interface ("Inspection Data

Access Free Qm Config Guide

Interface in Quality Management") is an open interface designed for exchanging inspection processing data between the QM application component and external systems. Inspection specifications defined in the QM component are transferred to the external system.

SAP Library - Inspection Data

Interface (QM-IDI)

Common required configuration settings across the QM module are defined here. Certain settings (like selected set, code and code group, inspection point) can be defined at plant level in addition to the other level where it is available. QM Module plant level control data are defined in this setting.
