Why You should Remove your ENGINE COVER | AnthonyJ350 ...

Sure, a plastic cover traps some heat, but not that much that you would notice any difference. Unless it's some rare case of a really bad engineering. And in some other cases the cover might be designed to channel the airflow to some part that tends to overheat otherwise, so removing the cover might even make the engine to run worse.

Wouldn't removing plastic engine covers make the engine ...

If you remove it, you are leaving yourself open to possibly damaging critical components you expose by removing that bottom engine cover! If by bad luck you happen to run over say a piece of lumber, a hubcap, or just about anything that falls off a truck or someone elses vehicle, it may kick up and do some extensive damage to say your oilpan, steering pump..etc. Risky, but it's your call.

Removal of plastic cover under engine? | Bimmerfest BMW

-The plastic cover is sound deadening, so increased engine noise in the cabin. Most see this as a disadvantage, but I actually would like more engine noise. Not on long trips where it could get tiring, but then I would just put the cover back on.

What would happen if I took the plastic engine cover off?

Remove plastic engine cover? If this is your first visit, be sure to check out the FAQ by clicking the link above. You may have to register before you can post: click the register link above to proceed. To start viewing messages, select the forum that you want to visit from the selection below.

Remove plastic engine cover? - ClubSX4.com

While doing some repairs, I lost one of the screws that holds the plastic engine cover on my Honda Pilot. It costs about \$10 to buy a new screw. If the engine cover serves no real purpose aside from having the Honda name on the top of the engine, why shouldn't I just leave it off? I could save \$10, and may improve the cooling of my engine (every so slightly.) Thanks!

Is the plastic engine cover really needed? - Maintenance ...

This 20-second video will show you how to remove the engine cover, (air filter housing) from a Mercedes-Benz engine.

How to remove cover from a Mercedes-Benz engine - YouTube

Reply. ... engine cover, engine air dam, driveshaft boots, fenders, coil spring isolators, air box, steering stabilizer, wheels large enough to fit around the brake calipers ...

To remove 3.6 engine cover or not? | Jeep Wrangler Forum

Found a pretty good YouTube video that helps show what's going on under the cover. Thanks for the insight. Thanks for the insight. The manual gives spark plug AC DELCO #41–109 (6 cyl) or #41-108 (4 cyl), this seems to be an iridium spark plug with a 100,000 mile rating.

Remove the Engine Cover | Buick Forums

Anybody who's into racing their trucks usually removes the engine cover. Mine came off the day the truck came home, plus I think the engine isn't a bad looking engine, and to me the cover actually detracts from the looks of it. It's not as good looking an engine as an old BB Chevy, but it's still a decent looking engine in my opinion, lol

Remove Engine Cover | DODGE RAM FORUM - Dodge Truck Forums

Grasp the bottom-right edge of the engine cover. Lift it upward to unhook the the clips. Move to the other side and do the same. Lift the engine cover up to remove it. On some Cadillac models, a brace runs horizontally across the engine compartment. On these models, slide the engine cover toward you to remove it.

The plastic covers in an engine compartment serve a few purposes: * The obvious, cosmetic purpose of maintaining a "clean" appearance * Protect the motorist from moving parts and dirty surfaces when performing the most basic maintenance items (check...

Are car engine bay plastic compartment covers necessary ...

The engine splash shield is a plastic or metal protective panel installed on the underside of an automotive engine. The upper engine splash shield allows airflow to go to the intake while covering the belt, fans, sensors, and radiator. The lower engine splash guard, meanwhile, shields the exhaust and transmission systems.
